

Elise Boisson
Curriculum Vitae

Email: esb285@cornell.edu | Phone: +917 378 3001

Education

- Cornell University, B.S. in Mechanical Engineering (Expected 2027)
- Relevant coursework: mechanics of materials, thermodynamics, fluid mechanics, design, CAD/CAE, and experimental analysis

Courses

- MAE 3270: Mechanics of Materials
- Fluid mechanics and thermal systems coursework
- CAD and finite-element analysis coursework
- Design and prototyping courses with hands-on engineering projects

Research

- Mechanical engineering research and analytical work focused on design validation, materials, and system performance
- Experience combining hand calculations, simulations, and experimental documentation to evaluate engineering solutions

Projects

- Designing a Wrench - Advanced CAD and ANSYS analysis for a structural design project
- Fluid Mechanics Dissection Video - Dehumidifier disassembly and fluid systems analysis
- Independent and team-based engineering design work centered on prototyping, testing, and technical communication

Jobs / Experience

- Student engineering work involving CAD, analysis, and technical documentation
- Mechanical design and research support through project-based coursework and hands-on design work

Clubs / Leadership

- Cornell engineering community involvement through design-focused and technical student activities
- Collaboration on interdisciplinary projects requiring communication, documentation, and problem solving

Skills

- CAD: Fusion 360, Autodesk tools
- Analysis: ANSYS, MATLAB, finite-element and mechanical design analysis
- Design: prototyping, iteration, technical documentation, and presentation
- Tools: Microsoft Office, basic reporting, image and video documentation
